INDEX

This index covers the 12 issues of Railway Gazette published between January and December 1988 (Volume 144), together with the two associated annual publications *Developing Metros 1988* distributed with the October issue and *Developing Railways 1989* which was distributed with the December 1988 issue. Most entries in this index are classified first by country and then under the railway or metro authority concerned. Entries affecting one or more country are listed under International, which precedes the alphabetical listing of countries. Separate sections at the end of the index cover Letters to the Editor, Maps, Product News, Publications, and People.

For the convenience of those who do not bind back copies, the table below shows the numbers of pages contained in each issue.

Developing Metros and Developing Railways entries are prefixed DM and DR
